Project Concept

1

Player Control

You control a

Warrior

 in this

top Down

 game

where

Keyboard input (WASD)

 makes the player

Move in 4 directions and interact with the world (NPCs, objects, enemies).

2

Basic Gameplay

During the game,

Enemies, NPCs, and obstacles

 appear from

Different zones of the map,

and the goal of the game is to

Complete quests, defeat enemies, and explore the environment to level up and progress through the story.

3

Sound & Effects

There will be sound effects

For attacks, footsteps, item pickups, end enemy interactions,

 and particle effects

For magic, damage, and leveling up.

[optional] There will also be

Environmental background music and animated effects during cutscenes or transitions.

4

Gameplay Mechanics

As the game progresses,

The player unlocks new abilities and encounters stronger enemies,

 making it

More challenging and rewarding

[optional] There will also be

An inventory system, a level-up system, and a quest tracker.

5

User Interface

The

Health bar and experience points

 will

increase/decrease

 whenever

The player takes damage or gains experience from defeating enemies.

At the start of the game, the title

The Hero's Journey

 will appear and the game will end when

All the story-based quest are completed.

6

Other
Features

This project includes a variety of features beyond basic movement and combat that enhance the RPG experience:

- **Quest System:** Accept, track, and complete multiple types of quest (collection, defeat enemies)
- **NPC dialogue system:** Dynamic conversations with branching paths and trigger-based interactions.
- **Experience and leveling system:** Gain XP from enemies and quest, level up to increase player stats.
- **Inventory system:** Pick up items and track them through an inventory UI.
- **Enemies AI:** Enemies can move randomly, detect player proximity, and attack
- **Sound and music management:** Background music, sound effects, and volume controls (FX/music/global).
- **Scene Transitions:** Smooth transitions between areas using triggers and DontDestroyOnLoad.
- **UI Manager:** Controls HUD elements like health bars, damage indicators, and text feedback.

Project Timeline

Milestone	Description	Due
#1	- Player movement, camera follow, and animations	08/8
#2	- Combat system and enemy AI	08/10
#3	- NPC interactions and quest system	08/12
#4	- Inventory, UI (HUD, health bar, XP)	08/14
#5	- Final polish: sound, VFX, bug fixes	08/16
Backlog	- Feature on backlog - not a part of the minimum viable product - Feature on backlog - not a part of the minimum viable product - Feature on backlog - not a part of the minimum viable product	mm/dd
