Project Concept

1

Player Control

You control a *Warrior* in this *top Down* game where *Keyboard input (WASD)* makes the player *Move in 4 directions and interact with the world (NPCs, objects, enemies).*

2

Basic Gameplay

During the game, *NPCs, such as enemies, and obstacles* Are locate In *Different zones of the map,* and the goal of the game is to *To collect as many points as possible, this will be done by collecting items, artefacts, and shooting enemies.*

3

Sound & Effects

There will be sound effects *For attacks, footsteps, item pickups, end enemy interactions,* and particle effects *For magic, damage, and leveling up.* [optional] There will also be *Environmental background music and animated effects during cutscenes or transitions.*

4

Gameplay Mechanics

As the game progresses, ** The player increases abilities such as attack strength, Defends, health after finishing a level. Each level will make the enemy stronger.* making it *More challenging to get more points.* [optional] There will also be *An inventory system, a level-up system.*

5 User Interface	The	will	whenever
	Health bar and experience points	increase/decrease	The player takes damage or gains experience from defeating enemies.
	At the start of the game, the title		and the game will end when
	No start	will appear	When health is 0

6 Other Features	Thit project includes a variety of features beyond basic movement and combat that enhance the RPG experience: Experience and leveling system: Gain XP from enemies and quest, level up to increase player stats. Enemies AI: Enemies can move randomly, detect player proximity, and attack Scene Transitions: Smooth transitions between areas using triggers and DontDestroyOnLoad. UI Manager: Controls HUD elements like health bars, damage indicators, and text feedback. Learn Spanish words: what make my game different from the others (Add text collision detection to each object with its name in Spanish, so players can learn Spanish through the game).
